Profile

Computer Science student at National University of La Plata (UNLP) and graduate as a University Programming Analyst (APU).

Focused on data engineering and data processing, with experience building ETL pipelines in Python and SQL, working with geospatial data (PostGIS, QGIS) and integrating multiple data sources.

Experience

Gilera / BI & GIS Data Project

Dec 2025 – Present

- Built and maintained ETL pipelines in Python to integrate commercial and demographic datasets.
- Processed and structured geospatial data across Argentina (provinces, departments, cities).
- Performed data ingestion, cleaning, normalization and enrichment using INDEC datasets.
- Developed SQL queries to compute business KPIs.
- Combined geospatial, demographic and sales data for analysis.
- Worked with external data sources, structuring ingestion workflows adaptable to API-based integrations.
- Used PostGIS for spatial queries and data modeling.

Technologies: Python - SQL - Docker - PostGIS - QGIS.

Finance Club UNLP / Tech Lead

Feb 2025 – Present

- Developed data processing scripts and pipelines in Python.
- Built internal tools for financial data analysis.
- Automated repetitive data workflows.
- Extracted data using web scraping (BeautifulSoup, Selenium).
- Provided support on data processing and tools.

Technologies: Python · Matplotlib - BeautifulSoup - Selenium

National University of La Plata (UNLP) / Instructor

School of Informatics & School of Economics

October 2025 – Present

- Teach courses on: “Finance in the Age of AI” and “Applied Data Science for Finance”.
- Design and deliver classes on data analysis, Python, and financial applications.
- Guide students in hands-on projects involving data processing and modeling.

- Explain technical concepts to non-technical audiences.

Education

BSc in Computer Science (4th Year)

National University of La Plata (UNLP)

University Programming Analyst (APU) – Graduated

National University of La Plata (UNLP)

First Certificate in English (B2)

Cambridge Assessment English

Technical Skills

- Python, SQL.
- ETL pipelines, data ingestion, data processing.
- PostgreSQL, PostGIS.
- QGIS.
- Pandas, Matplotlib.
- BeautifulSoup, Selenium.
- Docker, Linux.
- REST APIs.
